Job Title

Seasoned Garden Leader

Agency

Edible Healing Garden

Location

Violence Intervention Program Clinic HUB - Pediatric

Pay Rate

Volunteer

Responsibilities

As an experienced gardener, your expertise and passion will play a crucial role in maintaining and enhancing our beautiful garden.

Expectations:

1. Leadership: As a lead gardener, you will be responsible for guiding and supporting other team members. Your leadership skills will inspire and motivate the team.
2. Knowledge Sharing: Share your gardening knowledge with fellow gardeners. Encourage learning and growth within the team.
3. Timeliness: Arrive on time for scheduled shifts and meetings. Punctuality is essential for smooth garden operations.
4. Communication: Maintain open communication with other gardeners, volunteers, and the garden coordinator.
5. Safety: Prioritize safety in all garden activities. Follow safety guidelines and encourage others to do the same.
7. Encourage Sponsorship: Solicit donations of plants, seeds, compost, mulch, extra fruits/vegetables from your own garden/business, garden materials/equipment/supplies/tools.
8. Event Planning: Help plan events and workshops.

Garden Cleanliness:

1. Weeding: Due to vandalization we will be limiting this activity to our garden leaders.
2. Trash Removal: Dispose of any litter or debris properly. Keep pathways clear.
3. Tool Maintenance: Clean and store gardening tools after use. Report any damaged tools to the coordinator.
4. Composting: Properly manage compost bins to prevent odors and pests.
5. Signage: Help the garden remain tidy by maintaining plant signage.

Required Knowledge, Skills and Abilities

Sustainability Practices:

1. Water Conservation: Use water efficiently under the leaves to preserve plants.
2. Natural Pest Control: Prioritize organic companion planting and beneficial insects.
3. Native Plants: Choose native plants that thrive in our local climate. They require less water and support local ecosystems.
4. Composting: Turn garden waste into nutrient-rich compost for healthier soil.
5. Germination: Sow seeds and plant seedlings.
